

With more than 30 years involvement with the European nuclear fleet and representing the equivalent generation of 30,000 MW (whether BWR or PWR), Bureau Veritas is an experienced quality, safety, health and environmental partner that you can trust for all your compliance requirements, from construction to operation, and finally to de-commissioning.

Bureau Veritas is qualified by most of the National Nuclear Safety Authorities, and is able to demonstrate through its strict quality management system a record of recognition in all the fields of activity within the nuclear sector.

In addition to our knowledge in nuclear codes and standards, Bureau Veritas is the second largest ASME service provider in the world.

NUCLEAR INDUSTRY SERVICES

Move Forward with Confidence

Where regulatory compliance is a key question

Nuclear industry is one of the most regulated and complex industries, which is reflected in many construction projects and operations. Knowledge of codes, compliance process designs and execution, together with a link to nuclear safety authorities are all key features which Bureau Veritas can deliver to your organization. These services are supported, in particular in Europe, by a set of specific accreditations...

Your business stakes

In large and complex Nuclear plant projects, mastering safety, quality and environmental challenges of installations and equipments is a key success factor. Experience in working on these daily QHSE stakes and dealing with nuclear authorities, utilities, industrial producers, civil engineers or subcontractors is vital and Bureau Veritas can help your company globally to protect employees and prevent accidents.

Your benefits in choosing Bureau Veritas

- Industrial partner throughout the nuclear plant lifecycle, from construction to dismantling
- Expertise in all technical fields involved in nuclear activity (geotechnics, site construction, noise and pollution, building health & safety,...)
- Third independent inspection accredited company
- QHSE risk management expertise
- Dedicated expertise for pressure vessels
- Worldwide reputation for professionalism and competent personnel

Wherever the nuclear plant is set, our international network, active in all countries with a nuclear program, can mobilize experienced teams to inspect their quality and compliance to your project needs.
