VERIFICATION OF CONFORMITY (VOC)

Consumer and environmental protection by implementation of national/international standards.

BUSINESS CHALLENGE

Governments today give high priority to promoting international trade while protecting consumer health, safety and the environment. Most national standard organizations, acting within a legislative framework, call for the intervention of independent third-party companies as a way to maintain full control on goods entering the domestic market.

SOLUTION

What is VOC?

The Verification of Conformity service involves checking conformity of goods according to national standards or an international equivalent.

At the same time it encourages importers and exporters to understand the need for compliance and its benefits. For ad hoc or first time shipments, importers go through the basic shipment process: documentary evidence is required to prove compliance with the required standards, or the goods can be tested in an approved laboratory.

The shipment will be subjected to physical verification to ensure that the documents match the products and that no deviations are found. Regular shipments can be treated under registration or licensing.

What are the key benefits?

- Protect consumers against dangerous, sub-standard or counterfeit products.
- Ensure the buyer that the goods ordered are those shipped.
- Ease trade operations by recognizing existing conformity proof to avoid unnecessary additional testing.
- Conform with recommendations of the World Trade Organization "Technical Barriers to Trade" Agreement.
- Protect domestic industry from unfair competition of poor quality imports.
- Improve the environment.
- Enhance the quality of exports.

WHY CHOOSE BUREAU VERITAS?

Bureau Veritas acts as a trade facilitation services provider on five continents and is one of the world's leading providers of import control and inspection services.

Our Certification and Accreditation

■ Bureau Veritas is certified ISO 9001 worldwide and was the first inspection body in the world to have its network accredited ISO 17020 within the scope of its Pre-Shipment Inspection and Verification of Conformity activities.

Our Network

■ Our global presence offers you the convenience of international expertise combined with local service where you need it.

Our Proven experience

■ Bureau Veritas was founded in 1828 and has a strong experience in trade facilitation services performed on behalf of numerous clients and government entities.

Founding member of IFIA (International Federation of Inspection Agencies)

■ The trade association for inspection agencies and other organizations that provide inspection, testing and certification services internationally. Bureau Veritas complies with the IFIA compliance Code and PSI Code of Practice.

RELATED SERVICES

Bureau Veritas offers a wide range of services related to trade facilitation:

- Pre-shipment Inspection (PSI)
- Verification of Conformity (VOC)
- Control by X-ray Scanner
- VeriVALUE database
- SMARTLane (Bureau Veritas Risk Management Solution)
- Inspection of Agrifood & Commodities
- Verification of Wood Products for Export
- Pre-shipment Inspection on a voluntary basis
- Vehicle Inspection Service (VIS)
- Vehicle Damage Tracking (VDT)
- Vehicle Stock Control (VSC)
- Vehicle Damage Evaluation (VDE)
- Vehicle Lease Inspections
- General Trade Services
- Customs Classification Code Service (CCCS)
- Supply Chain Security Services (SCSS)
- Customs Trade Partnership Against Terrorism (C-TPAT)
- Monitoring of Transport Vehicles (Tracking)
- Network Conformity Assessment
- Outsourcing Commodities Monitoring Programmes
- Single Window Concession

Some of these services are built to be compatible and can be combined to generate efficiency, consistency and optimization.

OUR APPROACH

The usual steps of VOC are as follows:

1- Import registration in the importing country

An Inspection Order (IO) containing details of the intended importation

is submitted by the importer to the Bureau Veritas local office, or by the exporter to the Bureau Veritas office in the country of export for each transaction subject to the program. The IO data is sent electronically to the appropriate Bureau Veritas office.

2- Intervention in the manufacturing country

- Contact with the Exporter

The Bureau Veritas office in the country of export sends a notice to the seller to ask when and where the goods will be ready for inspection and to request the following information:

- 1- Verification of conformity to standards of the importing country
 - checking of the existing certificates and testing/analysis reports
 - testing, if necessary
- 2- Inspection of exported goods:
 - visual and documentary checking
- 3- Final review

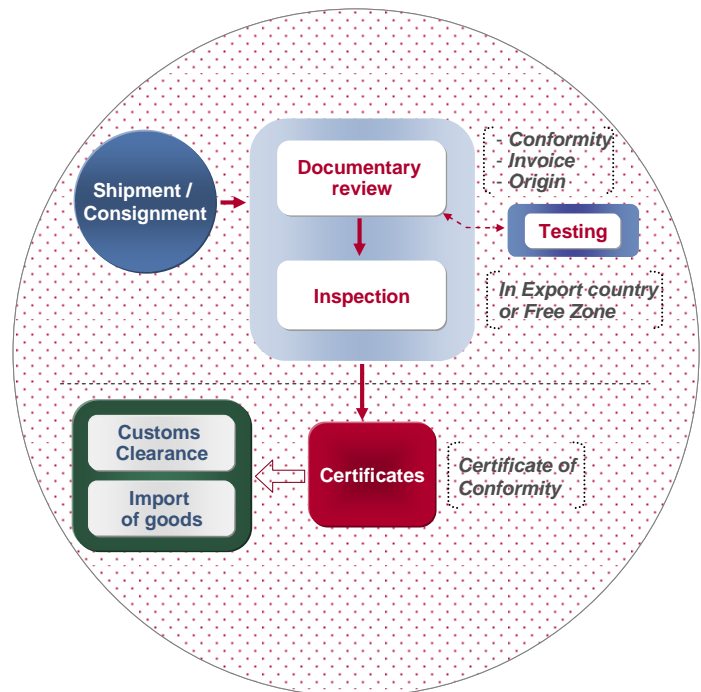

3- Customs clearance in the importing country

Bureau Veritas local office delivers the Certificate of Compliance to the importer.

The certificate is secured (protected against copy and falsification) and identifies

the goods and the applicable standard. It is required for customs clearance.

Detailed information on procedures in force in countries currently under contract is available from our local Bureau Veritas offices.

FAQ

Who pays for the inspection?

It could be the government, importer or exporter depending on the destination country (see corresponding datasheet on Web site).

Are all goods subject to inspection?

No, some goods may be prohibited and others can be exempted, depending on the destination country (see corresponding datasheet on Web site).

What is the difference with product certification?

VOC is limited to verification of conformity of goods per shipment to a specified country. Product certification usually applies to the product without any geographical limitation and is based on testing and factory audits.

What is the difference between PSI and VOC?

- PSI (Pre-shipment Inspection) is the assessment of quantity, price verification and customs classification prior to the shipment of goods. It provides advice to the customs in order they may collect the correct revenue.
- VOC (Verification of Conformity) checks conformity of goods to relevant national or international standard, taking into account the local specificities (language...).
